

**TAMPER-RESISTANT SECURITY FASTENERS THAT HIDE IN PLAIN SIGHT**

**High Security**

- Oval-pan heads with beveled sides prevent removal with conventional tools. Install in a recess for utmost security.
- Can only be removed by tools exclusively manufactured in the USA by Ultra Fasteners – not available in hardware stores.
- Does not invite tampering as it appears to be an ornament rather than a fastener head.

**Cosmetic**

- Excellent end-product appearance.

**Functional and Hygienic**

- No flutes, recesses, holes or sharp edges.
- Ideal for medical and food-handling equipment – design prevents trapping of bacteria or food.
- Ideal for electronics – design prevents electron discharge.
- No sharp edges to snag clothing or cause injury.

**Easy to Install**

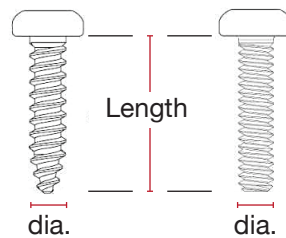

- Male-headed screws can be held in place by the screwdriver before entering the workpiece, simplifying their use even when access is limited.

**AVSAFE screwdriver**

**AVSAFE driver bit**  
(standard 1/4" hex)

**Tapping screw**

**Machine screw**

**OPTIONS**

- Self-tapping or machine screws with standard right-hand threads.
- Inch and metric sizes (standard and custom available).
- Stainless steel available.
